GREEN CAMPUS POLICY

GREEN CAMPUS POLICY

Green Campus Initiative Policy

A green campus is a term of relation for environment as well as health. As we know the golden words “**Health is Wealth**”. It’s also supporting practices like informal consumption, conservation practice and investment in removable energy. It also provide a place where environment friendly practice and education combine to protect sustainable and eco - friendly practices. In other hand it creates various opportunities which are listed below.

Foremost Green Campus Initiatives at our Institution :

- Waste water treatment
- Segregation of degradable and non-degradable solid waste
- Use of LED lamps and tube lights
- Digital Library
- Usage of bicycles, public transports and car sharing
- Plastic free campus
- Plantation and landscaping
- Creating awareness of environmental sustainability among the students and society
In order to green an area, it must be free of perpetually wasteful elements, use traditional energy sources for its daily energy requirements, manage disposal properly, buy condition-friendly supplies, and implement a strong recycle program. The organization has to create the time-bound strategies for carrying out the operations on the green spaces. In order to create a clean and green campus, these strategies should be incorporated into institutional planning and organizing documents.

Waste Management :

We have garbage bins located in Seminar hall, Classrooms, Laboratory, Library and College office. After collecting the waste, divided into categories such as paper waste, plastic waste and e-waste.

E-Waste Management :

E-waste management is the process of handling, collecting, transporting and recycling or disposing of scrapped electronic gadgets in an environmentally friendly way. The institution ensures that its usage of technology and generation of e-waste does not impact the environment.
