Programme Outcomes for B.Com

The output of a B.Com (Bachelor of Commerce) programme

1. Understanding of Commerce:

B.Com programs typically provide a strong foundation in commerce-related subjects.

2. Accounting Skills

Students often gain proficiency in financial accounting, cost accounting, and management accounting. They learn how to prepare and analyze financial statements, manage budgets, and make financial decisions.

3. Business Management

B.Com programs often include courses in business management and organizational behavior, teaching students how to effectively manage people and resources within an organization.

4. Economics

Students usually study microeconomics and macroeconomics, gaining insights into economic principles and how they apply to businesses and markets.

5. Business Ethics and Legal framework

You may learn about legal aspects of business, including contracts, business ethics, and corporate governance.

6. Statistics and Quantitative Analysis

B.Com programs often include courses in statistics and quantitative methods to help students make data-driven decisions.

7. Information Technology

In today's digital age, students may also learn about the use of information technology in business operations and management.

8. Communication Skills

Effective communication is essential in business, so programs often focus on written and oral communication skills.

9. International Business

Some programs offer courses on international business, covering topics like global markets, trade, and international finance.

10. Entrepreneurship

Entrepreneurship courses may teach students how to start and manage their own businesses.

(I/C Principal)

Incharge Principal
H.A.L. College of Science & Commerce
Ozar Township, Nashik-422 207.

Programme outcomes for a B.Sc. in Computer Science

The outcomes of a B.Sc. (Bachelor of Science) programme

1. Solid Foundation in Computer Science

Graduates will have a strong understanding of core computer science concepts, including data structures, algorithms, computer architecture, and software engineering principles.

2. Programming Proficiency

Graduates will be proficient in one or more programming languages, enabling them to write, debug, and maintain software applications.

3. Software Development Methodologies

Graduates will be familiar with various software development methodologies, including agile and waterfall approaches.

4. Cybersecurity Awareness

In an increasingly digital world, graduates will have a basic understanding of cybersecurity concepts and best practices.

5. Teamwork and Communication

Graduates will have experience working in teams and communicating technical concepts effectively.

6. Career Readiness

Graduates will be prepared for various roles in the field, such as software developer, systems analyst, data scientist, network administrator, and more.

7. Lifelong Learning

They will have a foundation for continuous learning, as the field of computer science is constantly evolving.

8. Environmental Science

To develop sensitivity for the natural, physical and human resources in the immediate environment.

Prin. Mrs. Anuradha C. Ahire
(I/C Principal)

Incharge Principal
H.A.L. College of Science & Commerce
Ozar Township, Nashik-422 207.

Programme Outcomes for M.Sc.(computer Science)

1. The Programme seeks to instil in students a deep and comprehensive knowledge of core computer science disciplines, advanced computer science concepts, theories, and principles, including algorithms, data structures, programming languages, artificial intelligence, machine learning, cloud computing, advanced databases, full stack development, software project management, and design patterns.
2. Graduates should be equipped with the ability to analyse complex problems in computer science, design innovative solutions, and implement them effectively.
3. The program aims to develop students' research skills, enabling them to evaluate existing research, contribute to knowledge in the field, and apply critical thinking to solve computational problems.
4. The program aims to cultivate a passion for research, encouraging students to engage in original research projects that contribute to the advancement of computer science knowledge and address real-world problems.
5. Students are expected to gain proficiency in multiple programming languages and develop the ability to write efficient, reliable, and maintainable code.
6. Depending on the chosen track or concentration, students may develop expertise in areas.
7. Through hands-on projects, practical assignments, and exposure to state-of-the-art tools and technologies, we aim to develop the technical proficiency and problem-solving skills necessary for success in the professional world.
8. Graduates should be adept at presenting complex technical concepts clearly and effectively, both in written and oral forms, to various audiences.
9. Computer science professionals often work in multidisciplinary teams. Students should learn to collaborate effectively with team members, understand different perspectives, and contribute productively to achieve common goals.
10. The program places a strong emphasis on ethical considerations, responsible use of technology, and awareness of the societal impact of computing solutions. We aim to produce graduates who approach their work with integrity and a sense of social responsibility.
11. Acknowledging the dynamic nature of computer science, we aim to instill in our students a desire for continuous learning and professional development, empowering them to adapt and thrive in the face of technological advancements; prepared them to adapt to new technologies and methodologies throughout their careers.
12. Students will be encouraged to think creatively and innovatively, exploring new ideas and approaches to solve computational problems and advance the state of the art in the field.
13. The program include On Job Training, internships, research work, research article and papers writing or a thesis that provides students with practical experience, applying their knowledge to real-world challenges.

Prin. Mrs. Anuradha C. Ahire
Incharge (IG) Principal
H. Incharge Principal
H.A.L. College of Science & Commerce
Ozar Township, Nashik-422 207.

Course Outcomes for B.Com

A Bachelor of Commerce (B.Com) program is designed to provide students with a strong foundation in business, finance, and commerce-related subjects. The course outcomes for a B.Com program typically reflect the knowledge and skills that students are expected to gain during their undergraduate studies. Here are some common course outcomes for a B.Com program:

1. Fundamental Business Knowledge

- Demonstrate a comprehensive understanding of fundamental concepts in business, including accounting, economics, management, marketing, and finance.

2. Financial Literacy

- Analyze and interpret financial statements, understand financial ratios, and evaluate the financial health of businesses.

3. Accounting Skills:

- Apply accounting principles to record financial transactions and prepare financial statements.

- Use accounting software and tools for data analysis.

4. Business Communication:

- Develop effective written and oral communication skills for business correspondence, reports, and presentations.

- Communicate professionally in a business context.

5. Business Ethics and Corporate Responsibility:

- Understand the ethical principles and social responsibility associated with business practices.

- Analyze ethical dilemmas in a business context.

6. Marketing and Sales Techniques:

- Understand marketing strategies, consumer behavior, and market research techniques.

- Develop marketing plans and strategies for products or services.

- To understand the concept of sales Analysis.

Incharge Principal
H.A.L. College of Science & Commerce
Ozar Township, Nashik-422 207.

Society's

7. Entrepreneurship and Small Business Management

- understand entrepreneurship concepts and the process of starting and managing small business.

- Create a business plan for a startup venture.

8. Banking and financial Management

- Develop the capacity for knowing banking concept and operations

- Develop awareness of banking practice.

9. Strategic and Organizational Management

- Understand organizational development.

- Understand the fundamentals of Strategic Management

- Understand basics of Organizational Management

Prin. Mrs. Anuradha C. Ahire
(I/C Principal)

Incharge Principal

H.A.L. College of Science & Commerce
Ozar Township, Nashik-422 207.

Course outcomes for a B.Sc. in Computer Science

It typically reflect the specific skills, knowledge, and competencies that students are expected to acquire by the end of their studies. Some common course outcomes for a B.Sc. in Computer Science are as follows

1. Problem Solving and Logical Thinking

- Students should be able to analyze complex problems, break them down into smaller components, and develop solutions.
- They should demonstrate logical thinking in solving computational problems.

2. Programming Skills

- Students should be proficient in at least one programming language and have a strong understanding of algorithms and data structures.
- They should be able to design, implement, and debug software applications.

3. Data Management

- Students should be able to design and manage databases, including creating schemas, querying data, and ensuring data integrity.
- They should understand the principles of database management systems (DBMS).

4. Develop Electronics Efficiency Skills

- By learning principals of digital electronics and semiconductor devices to build various electronics applications students study & understand basics of microprocessors and Analog Electronics to gain the knowledge of sensors.

5. Mathematics

- They develop mathematical skills by studying the subjects like Linear Algebra, Graph Theory, Numerical Techniques.

6. Communication Skills:

- Students should be able to communicate technical information effectively, both in writing and orally.
- They should be able to collaborate in a team and work on interdisciplinary projects.

Incharge Principal
H.A.L. College of Science & Commerce
Ozar Township, Nashik-422 207.

7. EVS

-An Environmental Studies major will be able to recognize the physical, chemical, and biological components of the earth's systems and show how they function.

8. Computer Systems and Architecture:

- Students should have knowledge of computer hardware, operating systems, and computer architecture.

- They should understand the interactions between software and hardware components.

9. Software Development

- Students should be capable of designing and developing software applications, including user interfaces and database systems.

- They should understand software development methodologies and best practices.

10. Web Development

- Students should have skills in web development, including front-end (HTML, CSS, JavaScript) and back-end (server-side scripting) technologies.

- They should be able to create interactive and responsive web applications.

11. Software Testing and Quality Assurance:

- Students should know how to test and debug software to ensure its correctness and reliability.

- They should be familiar with quality assurance processes and techniques.

These course outcomes provide a foundation for the knowledge and skills that students can expect to gain during their B.Sc. in Computer Science program.

**Prin. Mrs. Anuradha C. Ahire
(I/C Principal)**

Incharge Principal

H.A.L. College of Science & Commerce
Ozar Township, Nashik-422 207.

Course Outcomes for M.Sc. in Computer Science

It is designed to provide students with advanced knowledge and specialized skills in various areas of computer science. The course outcomes for M.Sc. in Computer Science program typically reflect the depth and breadth of learning expected at the graduate level. Here are some common course outcomes for M.Sc. in Computer Science:

- 1. Advanced Operating System**
 - Understand the Operating Systems Structure with example of Unix/Linux.
 - Learn the structure of files and directory in UNIX/LINUX OS.
 - Use various system calls related to file subsystem.
- 2. Artificial Intelligence**
 - Understand the fundamental concepts of Artificial Intelligence.
 - Identify and apply appropriate search strategies for AI problem.
 - Understand recent trends and future scope of AI.
- 3. Principles of Programming Language**
 - Understand their strengths and weaknesses
 - Learn new languages more quickly
 - Understand basic language implementation techniques
- 4. Cloud Computing**
 - To understand the importance of virtualization and how it has helped the development of cloud computing.
 - To understand the concept of cloud security.
- 5. Research Methodology**
 - Understand of the fundamental concepts of research, including the research process, research questions, hypotheses, and variables.
 - Develop a well-structured research proposal, outlining research questions, methodology, expected outcomes, and a rationale for the study.
- 6. Mobile App Development Technologies**
 - To provide students with a solid understanding of the mobile app development, Android operating system, its architecture, components, and the software development kit (SDK).
 - To teach students how to build Android applications from scratch, including UI design, handling user interactions, and integrating various features
- 7. Software Project Management**
 - Learn the skills that are required to ensure successful medium and large scale software projects.
 - Examine Requirements Elicitation, Project Management, Verification &Validation and Management of Large Software Engineering Projects
- 8. Full Stack Development**
 - Learn about the event loop, asynchronous programming, modules, packages, and streams.
 - Learn about the MVC pattern, routing, HTTP requests and responses, middleware, and error handling.
